

COCKTAIL CLASSICS

User Manual

30. JANUAR 2015

FH-JOANNEUM
Graz

Getting Started

This App is really intuitive and self explaining. You can easily navigate through the entire App by using the Navigation Drawer which can be opened by a swipe (left to right) or by touching the App Icon in the top left corner. The start screen is a cocktail list which can be browsed. You can filter for specific ingredients or categories of cocktails and search for cocktail names. You can sort the list by rating or name by touching the text.

Cocktail Recipes

You can select any cocktail of your choice and you will get to the recipe. In here you will find all ingredients you need and the recipe to make the selected cocktail. Ingredients that are already in your bar will have the bar symbol and ingredients that are already in the shopping list will have the shopping list symbol. You also have the possibility to save all ingredients to your shopping list or just the ones you don't have in your bar already. Additionally you can make your own note for the cocktail and rate the cocktail. You can even make your own picture from your cocktail and use it for the cocktail form now on in the app or just use a picture from your gallery.

Rate your Cocktail

Zutaten:

Zutaten:	Menge:
Gin	5.0 cl
Zitronensaft	2.0 cl
Orangensaft	4.0 cl
Grenadine	1.0 bl
Bitter Lemon	0.0 zum Auffüllen

Rezept:
Alles, bis auf Bitter Lemon, mit viel Eis in den Shaker. In ein eisgefülltes Glas abseihen und mit Bitter Lemon auffüllen.

Notiz:
Dieser Cocktail ist sehr gut. Ich mag ihn aber lieber mit mehr Zitronensaft!

Gets the ingredients in your shopping cart.

Your Shopping List

Through the Navigation Drawer you will get into the shopping list. In here you will find all ingredients that you selected from the cocktail detail view. Now you have the possibility to delete ingredients from your shopping list or mark them as bought, so they get transferred into your bar.

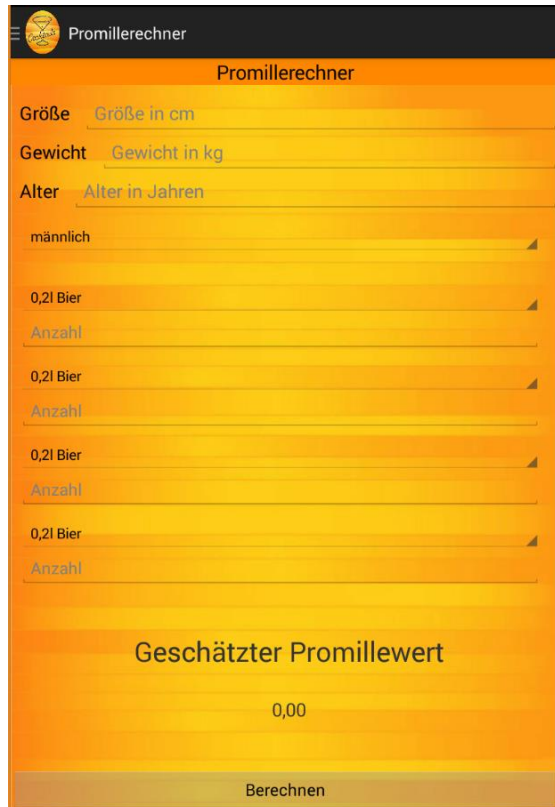

Your Bar

All the Ingredients that you have bought will show up in your bar. You will find your bar through the Navigation Drawer. In your bar, you can add or remove ingredients to or your bar.

Alcohol Level Calculator

After a few drinks you might want to know your alcohol level. In this case this App provides an alcohol level calculator that will give you an ESTIMATION of your alcohol level. You only need to insert your information and hit the calculate button.

The screenshot shows the 'Promillerechner' app interface. It features a dark header with a menu icon and the app title. The main area has an orange gradient background. Input fields are labeled 'Größe' (Größe in cm), 'Gewicht' (Gewicht in kg), and 'Alter' (Alter in Jahren). There are four rows for alcohol consumption, each with a dropdown menu showing '0,2l Bier' and a text input for 'Anzahl'. Below these is a section for 'Geschätzter Promillewert' displaying '0,00'. At the bottom is a 'Berechnen' button.
